

Applicants wish to add claims 5-12 to ensure that full protection for the compounds of claims 1-4 is provided in the patent that is to issue from this application. Claims 5-12, which are directed to pharmaceutical compositions containing and methods of using the compounds of claims 1-4 in the treatment of fungal infections, ensure that protection is provided for both the compounds *per se* and their intended use as described in the specification. Claims similar to claims 5-12 were present in the original application but were inadvertently not included at the time that allowed claims 1-4 were added to this application. The Examiner in this application would not be required to conduct an additional search or examination in consideration of claims 5-12 because the original search encompassed the subject matter of claims 5-12.

Applicants respectfully regret the failure to add claims 5-12 at the time that allowed claims 1-4 were added to this application. Applicants request that claims 5-12 be added at this time. If any fee due relating to this amendment, please charge Deposit Account no. 16-1445 accordingly. A second copy of this amendment is enclosed.

Date: May 16, 1996

Respectfully submitted:

Bryan C. Zielinski
